# NARCISSUS OR DAFFODILS

Narcissus or Daffodils are among the most popular of spring-flowering bulbs and should be planted freely in order to make a beautiful bulb-garden. They thrive in practically any climate in the United States and when once planted will continue to give immeasurable joy year after year.

Varieties marked F, are suitable for forcing. Our Narcissus and Daffodils are All Double-Nosed Bulbs.

**Culture.** Plant the bulbs as early as convenient in the autumn, to make root-growth before winter sets in. The bulbs may be left undisturbed for several years on good loamy soils. ## HARDY GARDEN LILIES

Among the stateliest of all hardy plants, Lilies, during their respective flowering seasons, constitute the chief attraction in the hardy border. They prefer a well-drained soil and should remain undisturbed for years. In the autumn give the bulbs a heavy mulching of leaves; coarse manure or straw will prove highly beneficial.

### Plant Hardy Lilies in Fall for Best Results

Arrangements have been made with our growers to have shipments of these bulbs available to plant before freezing weather sets in. Our experience has been that Lilies planted in the garden in fall become better established and give better blooms.

All Lily Bulbs offered in this folder are American-grown and can be delivered in time for planting this fall before frost.

Candidum and Regale Lilies ready for delivery in September. Magnificum, Album, Testaceum, Tenuifolium, Tigrinum, and Umbellatum are ready October 15.
